Objective

I am a dedicated web developer with a strong passion for creating dynamic, user-centric websites and applications. With experience in both front-end and back-end development, I specialize in building responsive, scalable, and secure web solutions. My goal is to contribute to innovative projects while growing in a collaborative environment, continuously improving my skills in Python development.

Education

- **B.Tech in Computer Science and Engineering**
Mohandas College of Engineering and Technology, APJ
Abdul Kalam Technological University
Duration: 2020 - 2024 | Location: Trivandrum
- **Higher Secondary Education**
Christ Nagar School, ISC
Percentage: 65% | Duration: 2018 - 2020 | Location:
Trivandrum

Skills

- **Programming Languages:** C, Java, Python (Basics), JavaScript
- **Web Development:** HTML, CSS, Bootstrap
- **Data Science & Machine Learning:** Scikit-learn, TensorFlow, Keras, OpenCV
- **Data Handling:** Data Preprocessing, Data Extraction, Feature Engineering
- **Databases:** SQL
- **Version Control:** Git
- **Cybersecurity:** Vulnerability Assessment, Penetration Testing, SOC Monitoring
- **Operating Systems:** Linux (Kali, Ubuntu), Windows

Certifications

- Certified SOC Analyst (CSA) | EC-Council
- Certified IT Infrastructure and SOC Analyst (CICSA) | RedTeam Hackers Academy
- CSS & JavaScript Certification Course for Beginners | Udemy
- Mastering Pointers in C | Udemy
- Build a Free Website with WordPress | Coursera
- Introduction to Microsoft Excel | Coursera

Volunteer Experience

- **Digital Literacy Volunteer** | Digi Pullampara, Trivandrum
Duration: October 2022 (1 week)
- **National Service Scheme (NSS) Volunteer**

Workshops & Training

- One-Day Technical Oriented Class | One Team Solutions EdTech Pvt Ltd
Focus: JavaScript frameworks, CSS, HTML, etc.
- 3-Day Coding Workshop in Python for Data Scientists | Srishti Innovation Computer Systems, Technopark
Focus: Python for Data Science (Aug 2023)
- One-Day Workshop on Advanced Driver Assistant Systems & Machine Learning | Techmaghi & IIT Delhi
Focus: Machine Learning Algorithms and ADAS (Nov 2024)

Projects

1. **Heart Disease Prediction – Leveraging Machine Learning for Health Insights**
 - **Technologies:** Python, Scikit-learn, Flask
 - **Achievements:** Achieved 87.42% accuracy in prediction.
2. **AgriTech App – Empowering Agriculture with Machine Learning**
 - **Technologies:** Python, TensorFlow, OpenCV, React Native
 - **Achievements:** 90% accuracy in disease detection.
3. **Vulnerability Assessment and Penetration Testing**
 - **Technologies:** Burp Suite, Nmap, Metasploit, OWASP ZAP
 - **Achievements:** Identified 20+ critical vulnerabilities.
4. **WordPress Deployment with Log Monitoring Using Splunk**
 - **Technologies:** Ubuntu Server, MySQL, WordPress, Splunk
 - **Achievements:** Implemented real-time log analysis.

Interests & Hobbies

- Cybersecurity
 - Web Development
 - Data Science
